

A cross-sectional view of a light-emitting device. A substrate 11 is shown with a light-emitting layer 12 on its top surface. A transparent conductive layer 13 is on the top surface of the light-emitting layer 12. A contact layer 4 is on the top surface of the transparent conductive layer 13. A light-emitting region 31 is defined within the light-emitting layer 12. A light-emitting region 32 is defined within the transparent conductive layer 13. A light-emitting region 3 is defined within the substrate 11. A light-emitting region L1 is defined within the substrate 11. Dashed lines indicate light rays emitted from the light-emitting regions 31, 32, 3, and L1.
